SUN POOLS

CELEBRATING 30 YEARS
OF PRODUCT EXCELLENCE!

Sun Pools started producing hand crafted swimming pools featuring American made composite materials in 1995. The product line has grown to over 30 pool and spa design options available in 4 color finishes and endless accessory options. Backed by our Lifetime Structural Warranty and great customer service, Sun Pools is now a trusted leader in the industry!

The Sun Pools manufacturing plant, located in Albany, KY, is an EPA approved Title V facility utilizing state of the art technology to lower our footprint and provide a productive environment for our highly skilled staff. Our family of employees boasts decades of knowledge and experience leading Sun Pools to provide one of the toughest composite pools on the market today!

We want to thank you for considering Sun Pools. Let us help you make your backyard your favorite vacation destination!

Aaron and Kevin McCarthy

You'll want to be in the Sun... *pool*

- Longer Playtime
- No Hair Discoloration

- Less Chemicals
- No Fading
- Easy Cleaning

- No Heavy Chlorine Odor
- No Torn or Snagged Swim Suits

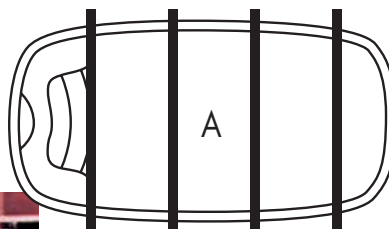

MANUFACTURING

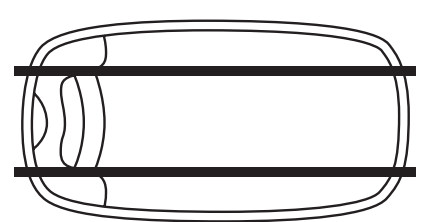

The construction of your new backyard resort begins with a careful inspection of the swimming pool shell mold or form. These design molds are hand-crafted by our company technicians. Next, the form is prepped and your new interior finish is applied. This surface, called gel-coat, is specially formulated to our high standards resulting in your best choice of any interior pool surface. This process leaves the pool bottom and steps smooth, yet slip resistant. The third step in production

is to encapsulate this new finish with a modified epoxy barrier coat. This barrier coat protects the pool finish from moisture, provides strength for the surface and increases the elasticity (flexibility) of the pool shell. The fourth process involves using hand laid layers of composite materials to add the bulk of the laminate. Sun Pools features a unique lamination process called Critical Point Lamination. This process involves using sheet fiberglass fabric that is hand-cut and hand laid for each pool (A). The process places the building material across the pool from side to side, instead of the industry standard of end to end. Our process creates one of the industries toughest pools.

Sun Pools Way

Industry Standard

After the main fabrication is completed, the team of laminators places reinforcing materials on the side walls and coping, or top rim, of the pool.

The completed pool is removed from the mold and outfitted with your package. Sun Pools are shipped complete: pool, light housings, plumbing fittings, tile, and waterfalls are already factory placed when your pool shell arrives saving weeks of installation time.

A typical installation is simple and straight forward.

1. LAYOUT POOL ON SITE

Remove items in area of pool installation. Clear sod or lawn for pool & deck area. Lay the pool out according to the pool installation plan.

2. EXCAVATE FOR POOL

Follow the installation plan setting grade stakes and string lines.

3. POOL ARRIVES

The pool shell arrives complete and ready to place in the hole.

4. BACKFILL POOL SHELL

Backfill the pool shell and connect plumbing lines. Pressure test for leaks.

5. SET FORMS FOR CONCRETE DECKING

6. POUR POOL DECK

7. CLEAN CONSTRUCTION AREA

8. INSTALL PROPER SAFETY BARRIERS

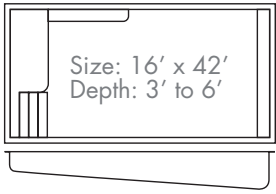

9. ENJOY YOUR NEW BACKYARD OASIS!

NOTE: Sun Pools can also be installed in wood decks, on rooftops and indoors.

Pool Dimensions

Size: 16' x 42'

Depth: 3' to 6'

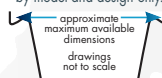

The Tropic model is our top selling large pool. The design is one of the largest one-piece

fiberglass pools available on the market today. Our customers wanted a large family sized pool with lots of interior room, bench seating and our popular walk-around safety ledge. The Tropic delivers all these features and more. This design features a 5'x12' tanning island with (3) built in water bubbler's, wrap-around deep-end seating and large, shallow end steps. Play all day in the Tropic's 3'- 6'- water depth and comfortable non-skid pool bottom. All Sun Pools fiberglass shells are hand crafted using our critical point lamination system, delivering the toughest pools on the market. This model is also designed for an easily installed auto cover.

Fiberglass pools are sold
"non-dimensionally"
by model and design only.

Pool Dimensions

Size: 15' x 40'

Depth: 3' to 8'

The St. Croix is the largest rectangle 8' deep model in production. This pool features shallow end steps

and seating along with a roomy interior. Pool depths of 3'— 8' expand the shallow and play space areas of the pool. Play all day with the comfortable non-skid bottom. The pool shell is hand crafted using our critical point lamination system, delivering the toughest pools on the market.
